

Unveiling the advances in the field of Neuroscience and Neurological Disorders

Tammi C. McGill-Carter

Family Focus, Inc, Valparaiso, In Lake County Medical Reserve Corps, Indiana Autism Society of Indiana, USA

The market research and analysis of neuroscience represents the most important and untapped market within the medical sector. This estimated marketing research is predicated on the probability of approval and sales of products in late-stage development, demographic trends, and marketing of the merchandise. Emerging markets once again help to boost revenues. The central nervous system therapeutics comprise approximately 15% of total pharmaceutical sales, nearly \$30 billion worldwide.

Estimated annual economic costs of anxiety disorders, depression, and schizophrenia are \$47 billion, \$44 billion, and \$33 billion per annum approximately. This session is to know the market value & development of Neurology Drugs, Current economics cost of clinical research and development.

There are over 9.9 million new instances of dementia every year around the world, inferring one new case every 3.2 seconds.

Importance and Scope:

The International Webinar on Neurology and Neuroscience is a unique platform that will bring together global leaders in the field of Neurology and Neuroscience from around the world to Barcelona, Spain. We will encounter renowned neuroscience and neurology students, public health experts, brain researchers, technicians, university technicians, business researchers, scholars to share cutting-edge work.

The aim of this webinar is to generate new ideas for better treatment in a convenient manner that will be beneficial throughout the world.

This webinar will host seminars, symposia, and other activities that will help share new research and ideas on Neuroscience and the other branches thereof.

Market Research in Neurology and Neuroscience:

According to WHO 2013, the neurological condition is prevalent globally in about 7 individuals per 1,000 of the adult population aged 15–35. With reference to the recent WHO report it is estimated that in 2022, the US will have the maximum number of diagnosed predominant cases of schizophrenia with 1,777,333 cases, followed by Japan with 454,961 diagnosed predominant cases, and Italy with 154,331 diagnosed predominant cases. Around 5.4 million people in America are currently diagnosed with Alzheimer's disease. The American Alzheimer's Association estimates that by 2050 this figure would increase to 16 million

According to the WHO, 26 African countries in sub-Saharan Africa are known as the Meningitis belt and express the highest risk of an epidemic. In the last 10 years, the disease has caused an estimate of 700,000 cases and 70,000 deaths. According to the Alzheimer's Association with the costs of dementia and stroke alone projected to total more than \$600 billion by 2030. Every year \$1.8 billion is funded for cancer research. According to a global study conducted by the World Health Organization, 8 out of 10 disorders in the 3 highest disability classes are neurologic problems.

Market Research in Alzheimer's disease:

The market analysis of neurology represents the largest and untouched market in the medical sector. This estimated market analysis is based on the probability of approval and sales of products in late-stage development, demographic trends, and marketing of the product. The emerging markets once again help to boost revenues. CNS treatment and diagnostics account for about 15 percent of all pharmaceutical revenue worldwide, which is approximately \$30bn.

Estimated annual economic costs of anxiety disorders, depression, and schizophrenia are \$47 billion, \$44 billion, and \$33 billion per year respectively. The aim of this neurological meeting is to understand the market Value & Growth of Neurological Disease, Neurological Drug, Current Cost of Clinical Research, and Development.

According to the latest market analysis, it is forecast that Global Neurology Endoscopy Devices Market is projected to show growth of at 7.20% CAGR during the period 2017-2021.

The 2015 World Alzheimer's Report reviews ADI's worldwide estimates of the commonness, severity, and dementia expenditures based on efficient surveys. The study sets out key recommendations for giving dementia disease a worldwide framework. The study also provides an analysis of the evidence for and against late trends in dementia predominance and prevalence after a while, just as an investment.

Neuroscience Summit 2020 will be a focus destination for the International Neurology Research Societies, Associations, and Organizations. This event will bring together Neurologists, Directors, Neurosurgeons, heads of the department, Psychiatrists, Professors, Students from academia, and researchers in the field of Neurosciences, Government officials and global leaders to push forward the Neurology department.
